Dear Governor Cooper: Thank you for all you do for us, especially given the legislature with which you have to work. Please oppose the Atlantic Coast Pipeline; we don't need the fracked oil they will be transporting. We certainly don't need the pollution and environmental destruction that will most certainly accompany the construction and operation of the pipeline.

Recent studies done by scientists working for NC WARN have shown that we don't need the fossil fuels in NC, that we can fulfill our energy needs with renewal energy (solar and wind) and battery storage. Our family is installing Tesla batteries to augment our solar arrays in Chatham County. NC should consider incentivizing battery installation as one way to increase our use of renewable energy.

Thanks, again, for your leadership in these trying times.
